GUÍA DE RECOMENDACIONES DE FLUIDO PARA TRANSMISIÓN AUTOMÁTICA

Las siguientes páginas enumeran los vehículos para los cuales nuestros fluidos de transmisión pueden o no usarse.

VERSATRANS® ATF

Kendall® VersaTrans ATF se recomienda para vehículos más antiguos (en su mayoría anteriores al 2006) diseñados para un fluido de mayor viscosidad. Es un fluido de transmisión de calidad sintética y de primera calidad, y ha sido ampliamente probado en campo para su uso en la mayoría de los vehículos norteamericanos y en una amplia variedad de vehículos europeos y japoneses. Está aprobado por el OEM para servicio, cumple con las siguientes especificaciones:

- FORD MERCON V (LICENSE NOS. M5091007, M5091008, M5091009)
- VOITH DIWA TRANSMISSIONS

VERSATRANS LV ATF

Kendall VersaTrans LV ATF se recomienda para la mayoría de los vehículos del 2006 y más nuevos que requieren un fluido de baja viscosidad, así como para muchos vehículos más antiguos. Está aprobado para su uso en transmisiones automáticas de autos de pasajeros y camiones ligeros que requieren un fluido Ford MERCON® LV o GM DEXRON®-VI. También se recomienda su uso en vehículos Toyota donde se especifica un fluido Tipo WS, y en muchos vehículos de importación más nuevos. Está aprobado por el OEM para servicio, cumple con las siguientes especificaciones:

- FORD MERCON® LV (LICENSE NOS. MLV140201, MLV140202, MLV140203)
- GM DEXRON®-VI (LICENSE NO. J-60175)

CVT FLUID

Kendall CVT Fluid está diseñado para su uso en transmisiones continuamente variables (CVT) de tipo de banda y en CVT de cadena selecta equipados con un convertidor de torque. Es un fluido de transmisión totalmente sintético de primera calidad. El fluido CVT se recomienda para la mayoría de los vehículos Honda, Jeep, Mitsubishi, Nissan (excepto el híbrido Altima) y Suzuki con transmisiones CVT. No se recomienda para CVT o la mayoría de las transmisiones CVT de cadena, o en cualquier transmisión no CVT.

VERSATRANS CVT PLUS FLUID

Este fluido de transmisión totalmente sintético de calidad premium está diseñado específicamente para su uso en automóviles y camiones con transmisiones continuamente variables accionadas por banda y cadena, así como transmisiones automáticas de tipo escalonado. Está diseñado para su uso en una amplia gama de vehículos fuera de garantía que requieren un fluido CVT, lo que ayuda a las tiendas a reducir el inventario y minimizar el riesgo de una aplicación incorrecta. Con más de 1 millón de millas de pruebas en carretera, se ha demostrado que ofrece rendimiento y protección a los tres tipos de transmisiones.

Los fluidos OEM y los números de parte se pueden encontrar en las Check-Chart de las Guías de Lubricación publicadas por MOTOR Information Systems. Los listados múltiples son específicos para ciertos modelos y años de modelo y NO son intercambiables. Por favor consulta la guía del propietario para verificar la recomendación de fluidos adecuada para el vehículo.

VersaTrans® LV ATF

Está específicamente diseñado para ayudar a garantizar una larga vida útil y proporcionar un rendimiento de cambio constante durante la vida útil del fluido, así como un mejor rendimiento de cambio en condiciones de funcionamiento extremas. Es altamente estable al corte y tiene una excelente resistencia a la oxidación para una larga vida útil del fluido. Proporciona un excelente rendimiento anti-vibraciones y tiene excelentes propiedades a baja temperatura para facilitar el cambio en climas fríos. El fluido de baja viscosidad da como resultado una menor resistencia a la fricción (pérdida de agitación) para una mejor eficiencia de transmisión, lo que ofrece el potencial para un mejor rendimiento de ahorro de combustible.

VersaTrans®

Tiene propiedades de fricción cuidadosamente equilibradas para un cambio suave y un excelente rendimiento anti-vibración. Tiene alta estabilidad al corte y excelente resistencia a la oxidación para una larga vida útil. Proporciona una excelente protección contra el desgaste, ayuda a proteger contra la formación de lodo y barniz, y tiene excelentes propiedades a baja temperatura para facilitar el cambio en climas fríos. La formulación parcialmente sintética proporciona beneficios de rendimiento mejorados a temperaturas extremas en comparación con los fluidos de transmisión convencional, totalmente mineral.

CVT Fluid

Tiene propiedades de fricción cuidadosamente equilibradas para proteger contra deslizamiento y desgaste de la banda al tiempo que proporciona un excelente rendimiento anti-vibración. Tiene alta estabilidad al corte y excelente resistencia a la oxidación para una larga vida útil. Ayuda a proteger contra la formación de lodo y barniz, y tiene excelentes propiedades a baja temperatura para facilitar el cambio en climas fríos. La formulación sintética proporciona beneficios de rendimiento mejorados a temperaturas extremas en comparación con los fluidos de transmisión convencionales.

VersaTrans® CVT PLUS

es un fluido de transmisión totalmente sintético de primera calidad diseñado específicamente para su uso en autos de pasajeros y camiones de transmisión continua por banda y cadena, así como transmisiones automáticas de tipo escalonado. Está diseñado con propiedades de fricción únicas necesarias para la protección y el rendimiento en los tres tipos de transmisiones. Con más de 1 millón de millas de pruebas en carretera, ofrece un rendimiento comprobado en CVT y transmisiones automáticas de tipo escalonado.
